

AMENDMENTS TO THE CLAIMS

IN THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application. Please amend the claims as follows.

1. (original) A system comprising: a host computing device capable of interacting with a wireless network; and at least one client device capable of interacting with a wireless network; wherein the host computing device and the client device exchange data via a wireless network and the data comprises at least one datum relating to a clinical trial.
2. (original) The system of claim 1 wherein the data comprises a datum from at least one of the following data types: patient data; patient recruitment data; pharmaceutical data; medical device data; medical therapy data; efficacy data; side effect data; and/or clinical affect data.
3. (original) The system of claim 2 wherein the data is collected via a survey.
4. (original) The system of claim 3 wherein the survey is provided on the client device and the data is collected by the host computing device through the wireless network.
5. (original) The system of claim 4 wherein the wireless network comprises the internet.
6. (original) The system of claim 5 wherein the wireless exchange comprises an email.
7. (currently amended) A system comprising: a host computing device capable of interacting with a wireless network; and at least one client device capable of

interacting with a wireless network; wherein the host computing device and the client device exchange data via a wireless network and the data comprises at least one datum relating to at least one of the following: patient satisfaction; a patient diary; patient recruitment; and/or patient activity compliance.

8. (original) The system of claim 7 wherein the data is collected via a survey.

9. (original) The system of claim 8 wherein the survey is provided on the client device and the data is collected by the host computing device through the wireless network.

10. (original) The system of claim 9 wherein the wireless network comprises the internet.

11. (original) The system of claim 10 wherein the wireless exchange comprises an email.

12. (original) A system comprising: a host computing device capable of interacting with a wireless network; and at least one client device capable of interacting with a wireless network; wherein the host computing device and the client device exchange data via a wireless network and the data comprises at least one datum relating to at least one of the following: a market survey and/or customer satisfaction with a good or service.

13. (currently amended) The system of claim 12 ~~13~~ wherein the data is collected via a survey.

14. (original) The system of claim 13 wherein the survey is provided on the client device and the data is collected by the host computing device through the wireless network.

15. (original) A system comprising: a host computing device capable of interacting with a wireless network; and at least one client device capable of interacting with a wireless network; wherein the host computing device and the client device exchange data via a wireless network and the data comprises at least one datum relating to a poll.

16. (original) The system of claim 15 wherein the data is collected via a survey.

17. (original) The system of claim 16 wherein the survey is provided on the client device and the data is collected by the host computing device through the wireless network.

18. (currently amended) A method comprising: providing a host computing device capable of interacting with a wireless network; providing at least one client device capable of interacting with a wireless network; and exchanging data between the host computing device and the client device ~~exchange data~~ via a wireless network, wherein the data comprises at least one datum relating to a clinical trial.

19. (original) The method of claim 19 wherein the method further comprises providing a survey to the client device to generate data for exchange.

20. (canceled).
